

SPRING 2011 TRENDS

MODERN SAFARI

Add a little adventure to your wardrobe this spring with modern safari style. This season's most wearable trend features an earth-toned khaki, tan and green color palette, paired with leather and canvas accents. Keep the look sleek with skinny-cut cargo pants, tailored tops and lace-up utilitarian boots.

ECLECTIC CHIC

Going bolder and brighter than ever before, one of this season's hottest trends is all about the playful patterns. Mix up prints to take the trend a step further, just remember to keep a few rules in mind: wear prints in the same color family; pair bold patterns with smaller, more neutral prints; and pick patterns in tailored cuts for a chic look.

GO LONG

Giving minis a run for their money, fuller, longer skirts and dresses will be hitting the streets this spring. Styles range from floor-length halter dresses to full sequined skirts paired with toned down denim tops. And new for this year is the sheer modern maxi with ground-sweeping see-through material overlaying a shorter opaque skirt.

70'S SOPHISTICATE

This spring, the 70's are back in a big way – bellbottoms, halter tops and all! Master the look with high waisted wide-leg pants or flares, a billowing silk top tucked in, topped with a smart, skinny belt and layered beaded necklaces.

COLOR BLOCK

Color turns up the volume this season with intense orange, turquoise, honeysuckle pink and sunshine yellow. Try these saturated hues on everything from tops, bottoms, accessories and shoes. And don't be afraid to layer multiple vivid colors for an even bolder effect.
