

Winter Wonderland Trees

Create your own winter wonderland with the help of colorful thrift threads. Perfect for old plaid patterns or sweaters long forgotten, these holiday trees are guaranteed to spruce up any room. Group them together for your own fun-filled forest, or space them out to add a pop of color throughout the house.

You Will Need:

From Savers/Value Village

- Assorted wool sweaters in select colors and patterns (at least 80% wool, 100% works best)
- Alternatively, you can also use thick fabrics such as tablecloths, fabric remnant, wool coats, etc.

Other supplies

- Needle and thread to match sweaters (or sewing machine or hot glue)
- Scissors

Directions:

- 1) Felt the sweaters (see Sweater Scrap Ribbons project for instructions).
- 2) From the felted sweater fabric, cut triangle shapes to desired height and width. A mix of tall and shorter trees works best.
- 3) Fold triangle in half lengthwise, right sides facing together.
- 4) Sew or hot glue the long sides of the triangle together $\frac{1}{4}$ " in from the outer edge.
- 5) Turn triangle right side out and push the pointed tip out.
- 6) Arrange trees on surface as desired. Felted trees usually stand on their own, but for trees that don't, simply place a bottle underneath them for support.
